TWO ELEMENTS
FOR ONE-OF-A-KIND WASHROOMS

CREATE WASHROOM HARMONY

With the new Verge™ matching soap and faucets you won't have to compromise your restroom design with mismatched soap and faucets ever again. Available in multiple styles and finishes, each set pairs seamlessly with the Verge® handwashing basin or any commercial basin to provide the finishing touch to your one-of-a-kind restroom design.

VERGE

INTRODUCING VERGE™ SOAP DISPENSERS
WITH MATCHING FAUCETS

Designed with the industry's widest range of top-fill options and feature a smart sense system with LED light indicators that display low soap and battery. An audible and visual alert system guides refilling to avoid soap overfilling or spilling. The dispensers use universal bulk soap in foam and liquid options.

Impressive lineup of four styles and six finishes results in industry leading array of twenty-four options to achieve every designer's dream.

All Bradley Grab Bars are designed for safety and security of the physically disabled, and feature the 1.5" (38 mm) safety clearance recommended by Barrier-Free design experts and required under most codes.

ANCHORING DEVICES

Building construction will govern the type of anchorage required.

Note: All mounting kits must be specified as optional extras. Order one kit for each flange.

See technical data for details.

Bradley will design and manufacture modified bars to satisfy unique installation applications. Contact your local Bradley representative for information.

FINISH OPTION
"A" DIMENSION
"B" DIMENSION
"C" DIMENSION IF APPLIES OR BLANK
Always list dimensions in alphabetical order
(i.e., 36" x 20" (914 mm x 508 mm))

Note: If modifications are required to the dimensions other than A, B, or C, or if fractions are needed, contact Bradley for a submittal and special number. Unless otherwise stated, stand-off will be on long section of bar. All dimensions shown in diagrams are from wall to centerline of mounting flange or centerline of grab bar. Standard clearance is 1.5" (38 mm).

FEATURES

- Heavy-duty, 18-gauge stainless steel tubing
- Meets or exceeds requirements of ANSI Standard A117.1, ADA and ABA Accessibility Guidelines for Buildings and Facilities (ADAAG) and Uniform Federal Accessibility Standard (UFAS)
- Select configurations of the 812 and 817 series meet bariatric load requirements of the American Society of Healthcare Engineers (ASHE) 2010 guidelines for design and construction of healthcare facilities
- Attractive satin finish, safety grip finish or polished safety grip finish
- Easy to install with optional anchoring devices

HOW TO MEASURE GRAB BARS

All Grab Bar Configurations are specified using centerline to centerline dimensions.

SPECIFY THIS DIMENSION
36"
(914 mm)

DO NOT SPECIFY THIS DIMENSION
38-1/4"
(972 mm)
1. Obtain length of side bars:
   Side wall dimension - (Safety clearance 1.5" (38 mm) + 1/2 Diameter of Grab Bar + 2" (51 mm))

2. Obtain back bar dimension:
   Back wall dimension - (Safety clearance 1.5" (38 mm) + 1/2 Diameter of Grab Bar x 2" (51 mm))
   Example: 812 Series Grab Bar:
   If wall dimensions are 30" (762 mm) side x 58" (1473 mm) back x 30" (762 mm) side, then:
   Sides: 30" - (1.5" + .75" + 2") = 25.75"
   (762 mm - (38 mm + 19 mm + 51 mm) = 654 mm)
   Back: 58" - (1.5" + .75" x 2") = 53.5"
   (1473 mm - (38 mm + 19 mm + 51 mm) = 1359 mm)
   Grab Bar dimensions would be 25.75" x 53.5" x 25.75"
   (654 mm x 1359 mm x 654 mm)

VERGE TOP-FILL MULTI-FEED SOAP SYSTEM

In high and burst traffic situations with multiple handwashing stations, a top fill multi-feed soap system is available that supplies up to six soap dispensers. Bulk soap systems can save time and money with high capacity soap containers that don't have to be filled as often as individual soap containers. All new Verge soap styles are available with the automatic multi-feed option.

- Large 1.3 gallon (5.0 L) tank accepts foam or liquid universal soap
- Smart sense system with LED light indicators to display low soap and low power
- Audible and visual indicators prevent overfilling
- Brass cast fill port available in same 6 finishes as new Verge soap and faucet styles
- Works with foam or liquid soap based on the soap dispenser
- Vandal-resistant construction
- Assembly works with 6-3100 (Crestt), 6-3300 (Metro), 6-3500 (Linea), and 6-3700 (Zen) series soap dispensers

6-SOAP-MFT

Verge multi-feed system saves up to 85% on soap costs compared to individual cartridges.

PARTITION MATERIALS

BRADMAR™

Fabricated from 30% pre-consumer or 100% post-consumer recycled high-density polyethylene (HDPE). No-Site™ style partitions with no gap between the doors and pilasters are available in Bradmar. Standard colors including speckled and solid colors with stainless steel shoes and aluminum wall brackets. Suited for humid and wet areas, and high-traffic or vandal-prone locations. Recommended for schools, parks, recreation centers. 15-year warranty. Hardware: Heavy-duty aluminum. Extended heights available.

PHENOLIC

Highly durable. Almost any Formica®, Arborite® or Trespa color/pattern can be selected. Edges are solid black. Recommended for humid and wet areas. Resists water, oil, and bacteria. Withstands hose-down cleaning. Suited for outdoor parks, pools, shower rooms. 3-year warranty against delamination and discoloration. Hardware: Heavy-duty, cast stainless steel, stamped stainless steel door hinges. Extended heights available.

POWDER COATED

High-quality gloss finish. Low cost. Recommended for office buildings, restaurants, religious institutions and environments less prone to vandals. 15-year warranty against rust-out. Hardware: Heavy-duty, chromed Zamac. Extended heights available.

STAINLESS STEEL

High design and contemporary style. Soft brushed satin finish, 5WL textured or leather-grain patterns available. Textured patterns wrap around edges. Recommended for airports, stadiums, rest stops. 15-year warranty against rust-out. Hardware: Heavy-duty, chromed Zamac. Extended heights available.

PARTITION SERIES

400 SERIES
SENTINEL™ OVERHEAD BRACED

Overhead braced partitions provide the most economical solution for heavy-traffic and vandalism-prone areas. Because it requires no special floor or ceiling construction, installation is easy in new or old buildings. The anti-grip head rail provides outstanding rigidity.

500 SERIES
FLOOR BRACED

This style complements design with functional performance. Recommended for buildings with high ceilings, it enhances the effect of spaciousness. A minimum of 3" (76 mm) concrete construction is required for anchoring. This style is not available in Bradmar solid plastic.
600 SERIES
CEILING HUNG

Ideal for areas with low ceilings. Offering an area free from obstruction to allow for fast and easy maintenance, this system requires proper structural supports in the ceiling for maximum rigidity. Not recommended for ceiling heights over 8' (2.4M). This style is not available in Bradmar solid plastic.

700 SERIES FLOOR-TO-CEILING

Anchored at the floor and ceiling, main structural support can be provided by Series 500 or 600 mounting systems. Perfect for areas where additional support is required.
URINAL SCREENS

Wall-hung style provides economy and ease of maintenance while floor supported or floor-to-ceiling (not shown) screens offer extra stability for high-traffic areas.

SHOWER DIVIDERS

Available in Bradmar solid plastic, an advanced formula of high-density polyethylene (HDPE). Standard sized or customized to meet your facility layout, Bradmar shower dividers are available in multiple colors, including speckled and solid colors (see bradleycorp.com for complete list of colors). All Bradmar solid plastic products are covered by a 15-year warranty.

Design flexibility is a prime feature of Lenox® Lockers, offering countless options and configurations. Installation is simple. Lockers are shipped fully assembled and ready for attachment to the wall and each other. Solid plastic lockers are formed of polymer resin with homogeneous color. Doors and frames are 1/2" (13 mm) thick, and sides, shelves, tops and bottoms are 3/8" (10 mm) thick. Locker box is one piece, all welded construction, providing outstanding rigidity and strength. Continuous latch bar runs the entire length of the door, providing a secure closure. Handle mechanism is capable of accepting a padlock and is securely fastened to the door. NEW DCL Lock option has a digital combination, so no more lost keys. Stainless steel piano hinge is continuous and integrates into the full length of the door and main locker body. 20-year warranty against rust, delamination or breakage of any of the plastic components under normal use.

Z-LOCKER

Z-Locker design provides practical multi-tiered storage without wasting valuable floor space or compromising customer satisfaction. Double your locker availability while still providing clients with hanging space to keep garments wrinkle free.

GEAR LOCKERS

Wider and deeper than standard lockers, Lenox Gear Lockers provide maximum storage and maximum durability with the best lead time and best warranty available!

CUBBY LOCKER

The easy-access cubby locker is perfect for items that do not require locked storage. The durable cubby is shipped fully assembled and can reduce installation costs by up to 50 percent.

LOCKER BENCH

The 1" (25 mm) thick bench top is smooth, seamless and oversized. The 20" (508 mm) locker underneath provides valuable additional storage apace. Available in 3' (0.9 M) through 6' (1.8 M) lengths.

PEDESTAL BENCH

The bench top is 1.5" (38 mm) thick and available in 36" (914 mm) to 96" (2438 mm) in one-foot increments. Pedestals are black anodized aluminum. ADA-compliant height is 18.5" (470 mm). 9.5" 12," 18" and 24" (241 mm, 305 mm, 457 mm and 610 mm) widths available.

CUBBY BENCH

Convenient seating and easy-access storage in one. Space-saving solution. Shipped fully assembled.

STAINLESS STEEL

Stainless Steel is a low-carbon steel that contains chromium. The addition of chromium gives the steel its unique corrosion-resisting properties. It is extremely durable, resists corrosion, and stands up to many chemicals.

Despite the fact that stainless steel surfaces are generally non-tarnishing, they are not stain or rust proof. Stainless steel must be kept clean and free from contaminants. Frequent cleaning with mild soap and water or glass cleaner and a cotton cloth is required. Any discoloration or corrosion (commonly caused by contact with harsh cleaner, muriatic acid or bleach solutions) should be removed as soon as possible or permanent discolora tion and pitting of the surface could occur. Most discoloration can be removed with a mild cleanser or stainless steel cleaner and a Scotchbrite® pad. The surface should then be thoroughly rinsed with clear water. With proper maintenance, stainless steel will maintain its luster and appearance indefinitely.

MIRRORS

Bradley mirrors are fabricated from heavy-gauge stainless steel frames and plate glass or an alternative reflective surface. The frame can be cared for by following the general stainless steel maintenance instructions above. Reflective surfaces can be cleaned with any standard non-abrasive glass cleaner and a soft cloth. Care must be taken to avoid allowing the cleaner to run down the surface of the mirror and collect in the frame. If allowed to continue, this could lead to premature silver spoilage and spotting on stainless steel.

SOAP DISPENSERS

Bradley soap dispensers provide dependable, consistent operation over the long term when the proper soap is used and when a minimal amount of periodic maintenance is performed on the valves. Soaps satisfying these basic guidelines will provide consistent flow and reduce clogs.

Soap thickness is determined by a measurement called viscosity. Soap viscosity should be between 100 cps (centerpoise) and 2500 cps for all Bradley soap dispensers. The pH (acid) level of soaps that will perform consistently should be in the range of 6.5 to 8.5. More acidic soaps (pH levels lower than 6.5) will corrode metal parts (even stainless steel) and degrade rubber and plastic components. Most inexpensive soaps (typically the pink lotion type) fall into this acidic category and will eventually cause valve failure and metal corrosion. PCMX or Isopropanol-based antibacterial soaps (within viscosity and pH limits) will also work with Bradley dispensers.

Valves must also be maintained (cleaned) to function properly. At the very minimum, hot water should be pumped through valves periodically to clear out soap residue. Ideally valves should occasionally be soaked for 30 minutes in hot water or a soap valve cleaning solution. With proper maintenance and soap, Bradley dispensers will provide long-term, trouble-free operation.
