

FHA | Floor Doors

Single Door

Double Door

The FHA Series angle frame aluminum floor doors are economical and easy to install in interior applications. These hatches are constructed with stainless steel hardware throughout, so you can expect years of dependability. The FHA comes in extruded aluminum or a 2"x3" angle frame..

Product Characteristics

FHA SERIES

Door: 1/4" aluminum diamond-pattern tread plate

Frame: 1/4" extruded aluminum angle frame

Hinge: Stainless steel butt hinge

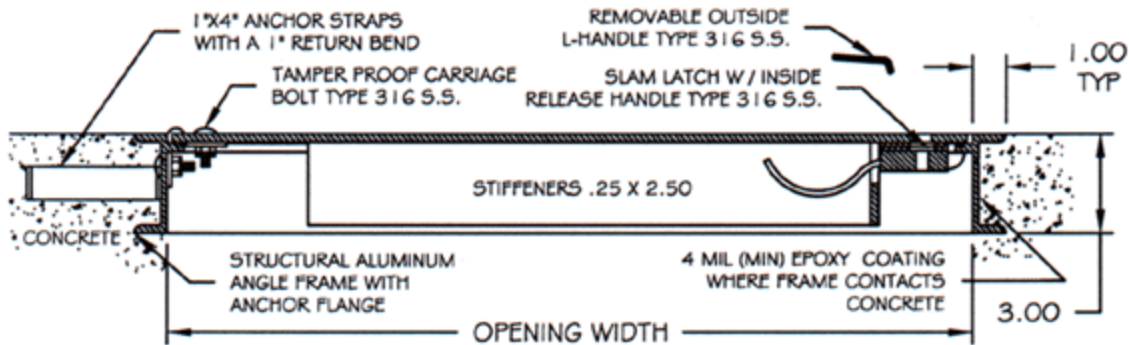

Latch: Stainless steel slam latch with an inside lever handle and an outside removable key handle

Finish: Mill finish aluminum. Frames provided with epoxy pain finish at areas that contact concrete

Spring: Stainless steel compression springs enclosed in tubes, which counterbalance the door to require no more than 10-30 lbs. of opening force

Hold-open arm: Stainless steel handle that automatically locks the door at 90 degrees when opened. Handle can be released with one hand for easy operation

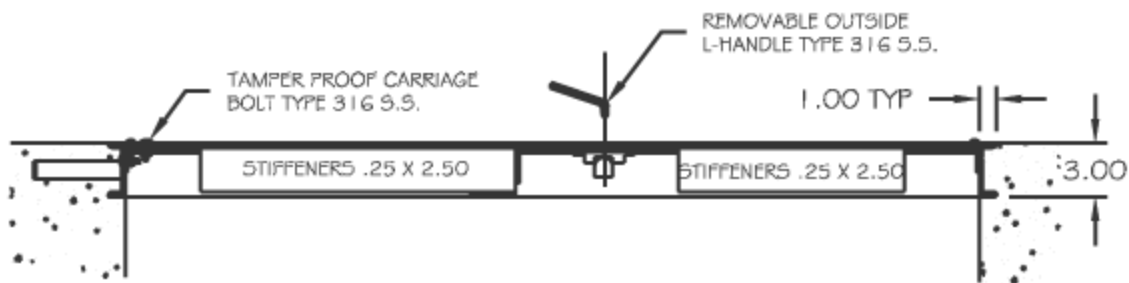

Standard load capacity: 300 psf. Optional: H-20 load capacity
